

Online admissions survey – what did you think?

- 93% of parents were satisfied with the e-admissions process overall.
- Of those who had applied for a school place in Bolton before, 88% said that they preferred applying online, mainly because they found it much easier.
- 85% of parents did not encounter any problems with the online admissions system.

You told us... we listened

We asked parents for ideas on how we could improve our online admissions system for future users. As a result we have made several improvements including the following:

Allocation emails

This year everyone should receive their offers at the same time. All emails will go out on midnight on offer day, rather than staggered as it was last year.

Online form

Changes have been made to the form to make it easier to understand and to navigate – there are less pages to click through.

More information

Supporting information about the schools will be posted on the website along with key dates in the process.

There are loads of benefits to applying online and it's really easy. There's no risk of your application being lost in the post and you'll receive an email confirmation so you know it's been received. You can also change your application as many times as you like up until the deadline.

So why not apply online?
