

**Home and Community Based Support Providers contracted to Bolton Council
(otherwise known as Homecare)**

Date of this edition: 20th August 2019

This is a list of Home and Community Based Support Providers that have agreements with Bolton Council with effect from 5th September 2016, which enables the Council to purchase the services described below.

What is Home and Community Based Support?

Home support is also often referred to as “home care” or “domiciliary care”. It may include assisting people to regain their ability to carry out basic tasks of everyday living (such as bathing, toileting or preparing food) or in doing these tasks for them if they are unable to do this.

Community Based Support refers to services provided outside of a person’s home. These may also include gaining or regaining skills and confidence, such as using public facilities (for instance, libraries, cinemas, public transport or shops).

To be included on this list, providers must be registered with the [Care Quality Commission \(CQC\)](#) and have been successful in reaching quality standards during a rigorous tendering exercise carried out by Bolton Council in 2016. The work that these providers carry out for Bolton Council is regularly monitored.

Why we have published this list?

This list is published to help service users, their relatives, carers and friends identify a suitable Home and Community Based Support Provider should they wish to make their own private arrangements to purchase this type of service. If this is done, then these arrangements are entirely between the individual customer and the provider.

What if a provider is not on this list?

If a provider is not on this list then this may be for various reasons:

- it may not have applied to do business with Bolton Council
- it may have been unsuccessful with the particular requirements of the tender
- it might have had its agreement ended

Therefore, it is not necessarily an indication of poor quality that a provider is not included on this list. Potential customers are encouraged to speak to providers not on the list if they wish to know why this is the case.

Quality

There are various ways of identifying the quality of homecare providers. All prospective private customers are encouraged to talk to several providers, ensure that they are registered with the CQC and check out their terms of business, prices and their approach to quality before making a final decision. The latest CQC inspection reports can be found here <http://www.cqc.org.uk/content/inspection-reports>.

The Care Quality Commission (CQC) registers and inspects all home care providers whether or not they are listed below. It publishes inspection reports on the internet at www.cqc.org.uk.

If you have any comments about this list or find any inaccuracies, please contact the Commissioning Team on 01204 335482, or commissioning@bolton.gov.uk

The following information shows the different customer groups for which providers have agreements with Bolton Council. Some of these have particular geographical areas in which this work is usually concentrated. However, it is likely that any of the providers listed may be willing to accept work in other parts of Bolton.

Some of these providers have offices outside Bolton but all provide services within Bolton.
