Eligibility

Just one person in the property receiving any of the following benefits can qualify:

- Pension Credit
- Universal Credit
- Income Support
- Housing Benefit
- Income based Job Seekers Allowance
- Income related Employment & Support Allowance
- Child Benefit*
- Tax Credits (Child or Working)

*Child benefit route has certain income thresholds; our team can help talk you through this.

Don't receive one of the listed benefits? Don't worry!...
Next Energy work with the Greater Manchester Combined Authority who may be able to deem you eligible, even if you are not in receipt of one of these benefits.

This is called 'Flexible' eligibility criteria; call us to find out more.

Do I qualify?

If your home has an EPC (Energy Performance Certificate) rating of D-G, then you may! We can check your home's rating and help to determine it if your home does not currently have one.

Customer eligibility is outlined on the next page; however, Next Energy also work with several councils across the North West to help you qualify even if you do not receive one of the listed benefits.

This scheme is open to homeowners and tenants living in both privately rented and social housing.

You can check your home's current EPC rating by going to **www.gov.uk/find-energy-certificate**

How much do I need to pay?

In most cases, absolutely nothing! During 2022, Next Energy carried out over one thousand installations through the ECO scheme, with less than 1% of customers needing to contribute towards the work.

What's the catch?

There isn't one! With the homeowner's permission, Next Energy can carry out a free, no-obligation assessment where we will determine the existing energy rating of your home. From there, we can explore all funding options and maximise the grant to make your home as efficient as possible and save you money on your energy bills.

Who is Next Energy?

Since 2016, Next Energy has grown to become one of the most reputable and reliable specialists within the renewables, heating, and insulation sectors in the country. Tailoring a vastly experienced and trained workforce, our award-winning team works alongside councils, housing providers, and utility companies to improve thousands of homes every year.

Great! How do I find out more?

Our team are here to help and available to speak from 9am to 5pm during weekdays on freephone number 0800 021 3145. Alternatively, you can scan the QR code overleaf with your smartphone to go straight to our website where we have an application page.

What is ECO?

The Energy Company Obligation (ECO) scheme is a government backed initiative aimed at improving the energy efficiency rating of thousands of homes across Great Britain and reducing homeowners' energy bills. Since 2013, energy companies have funded over 3.6 million different measures through the scheme, such as wall insulation, new heating systems, and renewables. The government plans to spend approximately £1 billion per year on the scheme until 2026.

ECO SCHEME

Eligibility Table
* Restrictions apply, call us to find out more.

EPC Rating	Homeowner (with or without mortgage)	Private Rented	Social Housing
E, F or G rated	All forms of home insulation!
